PROFILE

A versatile web developer specializing in backend development, with a background in IT support. I create engaging websites that empower clients to overcome business challenges and enhance user experiences. I oversee all aspects of web development, from navigation and layout to security architecture, leveraging Python, PHP, JavaScript, and HTML/CSS to ensure seamless functionality. In addition to development, I offer IT support, effectively troubleshooting technical issues and optimizing systems for greater efficiency. A lifelong learner, I enjoy reading, running, and exploring emerging technologies.
